List of Publication

Bioinformatics

1. S. Chatterjee; Ananya Das; "An Ensemble Algorithm Using Quantum Evolutionary Optimisation of Iterative Type-II Fuzzy Rule-Based System and Staged Pegasos Quantum Support Vector Classifier for Diagnosis of Breast Cancer" accepted for publication in Soft Computing, Springer, Impact Factor: 3.643.

2. S. Chatterjee; Ananya Das; "An ensemble algorithm integrating consensus-clustering with feature weighting based ranking and probabilistic fuzzy logic-multilayer perceptron classifier for diagnosis and staging of breast cancer using heterogeneous datasets", Applied Intelligence, Springer, https://doi.org/10.1007/s10489-022-04157-0 , SCI, Impact Factor 5.086.

3. S. Chatterjee; Ananya Das; "A Novel Systematic Approach to Diagnose Brain Tumor Using Integrated Type-II Fuzzy Logic and ANFIS (Adaptive Neuro Fuzzy Inference System) Model", accepted for publication in Soft Computing, Springer, Vol. 24, 2020, Page 11731–11754; Impact Factor: 3.643.

Software Dependability Analysis in Early Phase of Development

1. Chatterjee, S.; Saha, Deepjyoti; "Software dependability analysis under Neutrosophic environment using optimized Elman recurrent neural network-based classification algorithm and Mahalanobis distance-based ranking algorithm", Annals of Operation Research, Springer; https://doi.org/10.1007/s10479-024-05888-8, Impact Factor: 4.8.

Software Reliability Analysis in Early Phase of Development

1. Chatterjee, S.; and Maji, Bappa; "A Mahalanobis distance based algorithm for assigning rank to the predicted fault prone software modules", Applied Soft Computing, Elsevier, Vol. 70, 2018, Page: 764-772, SCIE, Impact Factor: 6.725.

2. Chatterjee, S.; Maji, Bappa; and Pham, H; "A fuzzy rule base generation algorithm in interval type-2 fuzzy logic system for fault prediction in the early phase of software development", Journal of Experimental & Theoretical Artificial Intelligence, Taylor & Francis, Vol. 31, 2019, Page 369-391, SCIE, Impact Factor: 2.34.

3. Chatterjee, S.; and Maji, Bappa; "Application of Bayesian belief network and interval type-2 fuzzy inference system to fault prediction during early phase of software development process", Applied Intelligence, Vol. 48, No. 8, 2018, page 2214–2228, Springer, SCI, Impact Factor: 5.086.

4. Chatterjee, S.; and Maji, Bappa; "A new fuzzy rule based algorithm for estimating software faults in early phase of development", Soft Computing, Springer, Vol. 20 (10), 2016, Page 4023–4035, SCIE, Impact Factor: 3.643.

5. Chatterjee, S.; Nigam, S.; Roy, Arunava; "Software fault prediction using neuro-fuzzy network and evolutionary learning approach", Neural Computing and Applications, Springer, Vol. 28, 2017, Page 1221-1231, SCIE, Impact Factor: 5.606.

Software Reliability

1. Chatterjee, S.; Saha, Deepjyoti; Sharma, Akhilesh and Verma, Yogesh; "Reliability and optimal release time analysis for multi up-gradation software with imperfect debugging and varied testing coverage under the effect of random field environments", Annals of Operation Research, Springer; https://doi.org/10.1007/s10479-021-04258-y, Impact Factor: 4.

2. Chatterjee, S.; Saha, Deepjyoti and Sharma, Akhilesh; "Multi-upgradation software reliability growth model with dependency of faults under change point and imperfect debugging", Journal of Software: Evolution and Process, John Wiley & Sons, https://doi.org/10.1002/smr.2344, Impact Factor: 1.972.

3. Chatterjee, S.; Bhagyashree Chaudhury and Chandan Bhar; "Optimal Release Time Determination via Fuzzy Goal Programming Approach for SDE Based Software Reliability Growth Model", Soft Computing, Vol. 25, 2021, Page: 3545–3564, Springer, Impact Factor: 3.643.

4. Chatterjee, S. ; Bhagyashree Chaudhury and Chandan Bhar; "Optimal Release Time Determination in Intuitionistic Fuzzy Environment Involving Randomized Cost Budget for SDE-Based Software Reliability Growth Model", Arabian Journal for Science and Engineering, Springer, Vol. 45, 2020, Page 2721–2741, SCIE, Impact Factor: 2.205.

5. Chatterjee, S.; and Shukla, Ankur; "A Unified Approach of Testing Coverage based Software Reliability Growth Modelling with Fault Detection Probability, Imperfect Debugging and Change Point", Journal of Software: Evolution and Process, John Wiley & Sons, Vol. 31(3), 2019; SCIE, Impact Factor: 1.972.

6. Chatterjee, S.; Singh, J.B.; Roy, Arunava and Shukla, Ankur; "NHPP Based Software Reliability Growth Modeling and Optimal Release Policy for N-Version Programming System with Increasing Fault Detection Rate under Imperfect Debugging" Proceedings of the National Academy of Sciences, India Section A: Physical Sciences, Springer, Vol. 90; 2020; Page 11-26; SCIE, Impact Factor: 1.544.

7. Chatterjee, S.; Shukla, Ankur; and Pham, H; "Modeling and Analysis of Software Fault Detectability and Removability with Time Variant Fault Exposure Ratio, Fault Removal Efficiency and Change Point", Proceedings of the Institution of Mechanical Engineers Part O: Journal of Risk and Reliability, SAGE, SCIE, Volume 233(2), 2018, page 246-258, Impact Factor: 2.021.

8. Chatterjee, S.; and Shukla, Ankur; "An Ideal Software Release Policy for An Improved Software Reliability Growth Model Incorporating Imperfect Debugging with Fault Removal Efficiency and Change Point"; Asia Pacific Journal of Operational Research, World Scientific, Vol. 34, No. 3 (2017) 1740017 (21 pages), SCIE, Impact Factor: 1.109.

9. Chatterjee, S.; and Shukla, Ankur; "Change point–based software reliability model under imperfect debugging with revised concept of fault dependency", Proceedings of the Institution of Mechanical Engineers Part O: Journal of Risk and Reliability, SAGE, Vol. 230 (06), 2016, Page 579-597, SCIE, Impact Factor: 1.914.

10. Chatterjee, S.; and Shukla, Ankur; “Modeling and Analysis of Software Fault Detection and Correction Process Through Weibull-Type Fault Reduction Factor, Change Point and Imperfect Debugging”; Arabian Journal for Science and Engineering, Springer, Vol. 41 (12), 2016, Page 5009–5025, SCIE, Impact Factor: 2.205.

11. Chatterjee, S.; and Roy, Arunava; “Novel Algorithms for Web Software Fault Prediction”, Quality and Reliability Engineering International, John Wiley & Sons, Vol. 31, 2015, Page 1517–1535, SCIE, Impact Factor: 2.885.

12. Chatterjee, S.; and Roy, Arunava; “Web software fault prediction under fuzzy environment using MODULO-M multivariate overlapping fuzzy clustering algorithm and newly proposed revised prediction algorithm”, Applied Soft Computing, Elsevier, Vol. 14, 2014, Page 372-396, SCIE, Impact Factor: 6.725.

13. Chatterjee, S.; Singh, J.B.; Roy, Arunava; “A structure-based software reliability allocation using fuzzy analytic hierarchy process”, International Journal of System Science, Taylor & Francis, Vol. 36, 2013, Page 513-525, SCIE, Impact Factor: 2.469.

14. Chatterjee, S.; Nigam, S.; Singh, J.B. and Upadhyaya, L.N.; “Effect of change point and imperfect debugging in software reliability and its optimal release policy”, Mathematical & Computer Modelling of Dynamical Systems: Methods, Tools and Applications in Engineering and Related Sciences, Taylor & Francis, Volume 18, Issue 5, 2012, Page 539-551, SCIE, Impact Factor: 0.862.

15. Chatterjee, S.; Nigam, S.; Singh, J.B. and Upadhyaya, L.N.; “Software Faults Predication Using NARX Network”, Applied Intelligence, Springer, Vol. 37, Issue 1, 2012, Page 121-129, SCI, Impact Factor: 5.086.

16. Chatterjee, S.; Nigam, S.; Singh, J.B. and Upadhyaya, L.N.; “Transfer Function Modeling in Software Reliability” Computing, Springer, Vol. 92, No.1, 2011, Page 33-48, SCI, Impact Factor: 2.044.

17. Chatterjee, S; Alam, S.S.; and Misra, R.B.; “Sequential Bayesian Technique: An Alternative Approach for Software Reliability Estimation”; Sadhana, Springer, Vol. 34, Part 2, April 2009, Page 235-241, SCIE, Impact Factor: 1.188.

18. Chatterjee, S; Misra, R.B. and Alam, S.S.; “N-Version Programming with Imperfect Debugging”; Computer and Electrical Engineering-An International Journal; ELSEVIER, Vol. 30; No. 6; 2004; Page 453-463, SCIE, Impact Factor: 3.818.

19. Chatterjee, S; Misra, R.B. and Alam, S.S.; “A Generalized Shock Model for Software Reliability”; Computer and Electrical Engineering-An International Journal, ELSEVIER, Vol. 24; 1998, Page 363-368, SCIE, Impact Factor: 3.818.

20. Chatterjee, S; Misra, R.B. and Alam, S., S.; “Joint Effect of Test Effort and Learning Factor on Software Reliability and Optimal Release Policy”; International Journal of System Science; Taylor & Francis; Vol. 8; No. 4; 1997; Page 391-396, SCIE, Impact Factor: 2.281.

21. Chatterjee, S; Misra, R.B. and Alam, S.,S.; “Prediction of Software Reliability Using an Auto Regressive Process”; International Journal of System Science; Taylor & Francis, Vol. 28; No. 2, 1997; Page 205-211, SCIE, Impact Factor: 2.281.

Other Journal Publication (Bioinformatics)

1. Chatterjee, S.; and Swarnaker, S; "Protein-Protein Interaction Prediction using Extended Natural Vector Representation of Proteins and Comparison with Natural Vector Method"; Design optimization using artificial intelligence; Book Chapter; CRC Press Taylor & Francis, 2024.

Other Journal Publication (Software Reliability)

1. Chatterjee, S.; Saha, Deepjyoti; Sharma, Akhilesh and Verma, Yogesh, "Early Phase Software Dependability Analysis: A Neutrosophic Inference System-based Approach", accepted in International Journal of Reliability, Quality and Safety Engineering, Scopus Indexed, (World Scientific); https://doi.org/10.1142/S0218539324500529.

2. Chatterjee, S.; and Saha, Deepjyoti; "IT2F-SEDNN: An Interval Type-2 Fuzzy Logic-based Stacked Ensemble Deep Learning Approach for Early Phase Software Dependability Analysis", Innovations in Systems and Software Engineering, Springer; https://doi.org/10.1007/s11334-024-00563-4.

3. Chatterjee, S.; Saha, Deepjyoti; Sharma, Akhilesh and Verma, Yogesh; "Software Reliability Analysis Using Nonlinear Transfer Function"; International Journal of Reliability, Quality and Safety Engineering, Vol. 29, No. 6, 2022.

4. S. Chatterjee; Bhagyashree Chaudhury, Chandan Bhar and Ankur Shukla; "Optimal Release Time Determination Using FMOCCP Involving Randomized Cost Budget for FSDE Based Software Reliability Growth Model", accepted for publication in International Journal of Reliability, Quality & Safety Engineering, World Scientific, Scopus Indexed.

5. Chatterjee, S.; and Roy, Arunava; "Transfer Function Modeling In Web Software Fault Prediction Implementing Pre-Whitening Technique", International Journal of Reliability, Quality & Safety Engineering, World Scientific, Vol.21 (05), 2014, Page 1-18, Scopus Indexed.

6. Chatterjee, S.; and Roy, Arunava; "APPLICATION OF NON-DECIMATED WAVELET PACKET TRANSFER FUNCTION IN WEB ERROR PREDICTION", International Journal of Systems Assurance Engineering and Management, Springer, Vol. 6, Page 407-433, Scopus Indexed.

7. Chatterjee, S.; Singh, J.B.; "A NHPP based software reliability model and optimal release policy with Logistic-Exponential test coverage under imperfect debugging", International Journal of Systems Assurance Engineering and Management, Springer, Vol. 5, 2014, Page 399-406, Scopus Indexed.

8. Chatterjee, S.; Singh, J.B.; Nigam, S. and Upadhyaya, L.N.; "A Study of a Single Multiplicative Neuron (SMN) Model for Software Reliability Prediction", Innovations in Intelligent Machines-3 Contemporary Achievements in Intelligent Systems, Book Edited by Springer-Verlag, 2012, Page 89-103.

9. Chatterjee, S.; Nigam, S.; Singh, J.B. and Upadhyaya, L.N.; "An Improved Additive Model for Reliability Analysis of Software with Modular Structure", Journal of Applied Mathematics and Informatics, The Korean Society for Computational and Applied Mathematics, Vol. 30(2012), No. 3 - 4, Page 489 - 498.

10. Chatterjee, S.; Singh, J.B.; Nigam, S. and Upadhyaya, L.N.; "Best Subset Selection of ARMA and ARIMA Models for Software Reliability Estimation" International Journal of Modeling and Simulation, Acta Press, Vol. 31, No. 2, 2011, 120-125, Scopus Indexed.

11. Chatterjee, S.; Nigam, S.; Singh, J.B. and Upadhyaya, L.N.; "Application of Fuzzy Time Series in Prediction of Time Between Failures & Faults in Software Reliability Assessment" Fuzzy Information and Engineering, Springer, Vol. 3, 2011, Page 293-309.

12. Chatterjee, S.; Singh, J.B.; Nigam, S. and Upadhyaya, L.N.; "Prediction of Software Reliability Using Fuzzy ARIMA Model" Journal of Fuzzy Mathematics, International Fuzzy Mathematics Institute, USA, Vol. 19, No.2, 2011, Page 495-502.

13. Chatterjee, S.; Upadhyaya, L.N.; Singh, J.B. and Nigam, S.; "Combined Effect of Fault Detection and Fault Introduction Rate on Software Reliability Modeling" Statistics in Transition-New Series, Vol. 10, No. 3. December 2009, Page 457-464.

14. Chatterjee, S., Das; S.K., Shekhar, A, and Dasgupta, S.; "A Realistic Approach for Software Reliability Growth Modeling with Imperfect Debugging and Multiple Failures" Statistics in Transition-New Series, vol. 9, No. 3, December 2008, Page 571-586.

15. Chatterjee, S; Misra, R.B. and Alam, S.,S.; "Symbolic Reliability Evaluation of software with Network Structure"; presented in International Conference APORS-2003, New Delhi, India, published in OPSEARCH, Springer, Vol. 41, No. 3, 2004.

16. Chatterjee, S; Alam, S.,S. and Misra, R.B.; "Analysis of Software Reliability Using Fuzzy Test Effort"; Journal of Fuzzy Mathematics; International Fuzzy Mathematics Institute, USA, Vol. 6; No. 1, 1998, Page 395-403.

17. Chatterjee, S; Alam, S.,S.; and Misra, R.B.; "Prediction of Software Reliability Using Fuzzy Time Series Approach"; Journal of Fuzzy Mathematics; International Fuzzy Mathematics Institute, USA, Vol. 6; No. 2, 1998, Page 373-380.

Sampling

1. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2013): "A General Procedure of Estimating the Population Variance when Coefficient of Variation of an Auxiliary Variable is known in Sample Surveys"; Quality & Quantity (Springer), 47, 4, 2331-2339, SCIE: 1.072.

2. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2013): "A Generalized Family of Transformed Ratio-Product Estimators for Variance in Sample Surveys"; Communication in Statistics – Theory and Methods (Taylor & Francis), 42, 10, 1839-1850, SCIE, Impact Factor: 0.353.

3. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2014): "A Class of Estimators of Population Variance using Auxiliary Information in Sample Surveys"; Communication in Statistics – Theory and Methods (Taylor & Francis), 43, 6, 2014, 1248-1260, SCIE, Impact Factor: 0.353.

4. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2014): "Improved Ratio and Product Exponential type Estimators for Finite Population Mean in Stratified Random Sampling"; Communications in Statistics: Theory & Methods (Taylor & Francis), 43, 15, 3269-3285, SCIE, Impact Factor: 0.353.

Other Journal Publication (Sampling)

1. Upadhyaya, L.N., Singh, H.P., Chatterjee, S. and Yadav, R. (2011): A Generalized Family of Transformed Ratio-Product Estimators of Finite Population Mean in Sample Surveys. Model Assisted Statistics and Applications, 6, 2, 137-150, Scopus Indexed.

2. Upadhyaya, L.N., Singh, H.P., Chatterjee, S. and Yadav, R. (2011): Improved Ratio and Product Exponential type Estimators for Finite Population Mean in Sample Surveys. Journal of Statistical Theory and Practice, 5, 2, 285-302, Scopus Indexed.

3. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2011): Improved Separate Ratio Exponential Estimator for Population Mean using Auxiliary Information. Statistics in Transition-new series, 12, 2, 401-412.

4. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2012): Almost Unbiased Ratio and Product Type Exponential Estimators. Statistics in Transition, 13, 3, 537-550.

5. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2012): Chain Ratio-type Exponential Estimator for Finite Population Mean in Double Sampling. Octogon Mathematical Magazine, 14, 1, 2012.

6. Yadav, R., Upadhyaya, L.N., Singh, H.P. and Chatterjee, S. (2013): A Chain Ratio Exponential type Estimators in Two-Phase Sampling using Auxiliary Information. Statistica, 73, 2, 221-234.

Conference Publication

1. Deepjyoti Saha and Subhashis Chatterjee (2022, November), “Optimized decision tree-based early phase software dependability analysis in uncertain environment”, International Interdisciplinary Conference on Mathematics, Engineering and Science (MESIICON) (pp. 1-6), Scopus Indexed (IEEE), 2022.
2. A. Das and S. Chatterjee; “Cancer Classification based on an Integrated Clustering and Classification Model using Gene Expression" accepted and presented in International Conference on Artificial Intelligence and Sustainable Engineering (AISE-2020), NIT Goa, January 2021. Published in \Lecture Notes in Electrical Engineering" book series.
